

Becker Acroma is pleased to announce the addition of *ECO BLEND* Blending System to its product line.

ECO BLEND is a ready to use water based inter-mix blending stain system that provides excellent grain definition and creates a look that can be compared to solvent spray stains. ECO Blend is part of a family of Green Solutions from Becker Acroma and is eligible for LEED points with BIFMA certification. ECO Blend can be used under both water-based or solvent-based sealers and topcoats.

ECO BLEND Water based Stains allows customers to formulate an unlimited number of water based stain colors in-house in any volume/batch size in the most cost-effective way possible. This system is ideal for small to medium-sized manufacturers or a "custom department" at a large manufacturer.

The *ECO BLEND* Blending System components include:

- **SIX ready-to-use intermixable water based stains** - produced by using high-end pigments allowing the creation of an unlimited number of custom colors.
- **Becker Acroma *ECO BLEND* Clear Bases** - Consists of 2 Bases:
 Spray & Wipe - **Stays open long enough to stain large six panel passage doors, yet dries quickly with minimal grain raise and excellent pore definition.** Becker Acroma is manufacturing this item – Code ES5600
 Spray-No-Wipe - **This forgiving spray only stain lays down evenly with minimal grain raise.** Becker Acroma is manufacturing this item – Code ES5160
- **Wood display box** - Stocked with 80 Oak or Maple solid wood color chips. These colors can be matched in-house using the *ECO BLEND* formula book.
- ***ECO BLEND* Formula Book** - Provides formulations in Parts, Weight and Volume allowing manufacturers to reproduce all 80 colors efficiently, with speed and at any volume.
- ***ECO BLEND* Website** www.ezstains.com - Log on to your own secure site where custom formulations may be entered and archived for future reference. The site includes a free "Batch Calculator" which generates the data needed to formulate desired quantities (pint, quart, a gallon etc.) and will create a print-out that can be used in production.
