MAINTANANCE AND CARE INSTRUCTION FOR COATING SYSTEMS

These coatings are the latest technology grown out of Nordic tradition. The manufacturer has chosen these coatings due to the extreme durability they offer as well as the environmental benefit. These coatings meet or exceed the standards set forth by the National Kitchen Cabinet Association.

1. **General cleaning should be performed with a damped cloth of water and a mild dish detergent.**
2. **A cloth dampened with mineral spirits may remove stains, marks, or spots that are not removed by general cleaning.**

CAUTION:

- **Do not use cleaners, which contain abrasives.**
- **Do not use cleaners, which contain ammonia – they may discolor.**
- **It is always recommended that a small inconspicuous area be tested when using any cleaner.**
- **Avoid baring down as this may cause burnishing.**

These instructions are general industry cleaning procedures, and are offered with no expressed warranty implied.
